

130. (new) The medical implant of claim 129, wherein said at least one structural element is a spaghetti-like strand.

131. (new) The medical implant of claim 129, wherein said at least one structural element comprises silicon rubber.

132. (new) The medical implant of claim 130, wherein said spaghetti-like strand comprises silicon rubber.

133. (new) The medical implant of claim 130, wherein said physiologically compatible material is plastic.

134. (new) The medical implant of claim 129, wherein said physiologically compatible material is plastic.

135. (new) The medical implant of claim 129, wherein said structural element has a wettable surface.

136. (new) The medical implant of claim 129, wherein said outer covering is made of a physiologically compatible material.

137. (new) The medical implant of claim 136, wherein said outer covering is made of plastic or silicone rubber.

138. (new) The medical implant of claim 130, wherein said outer covering is made of a physiologically compatible material.

139. (new) The medical implant of claim 131 wherein said outer covering is made of a physiologically compatible material.

140. (new) The medical implant of claim 139, wherein said outer covering is made of plastic or silicone rubber.

141. (new) The medical implant of claim 132, wherein said outer covering is made of a physiologically compatible material.

142. (new) The medical implant of claim 129, wherein a surface of said outer covering is hydrophilized.

143. (new) The medical implant of claim 129, wherein a surface of said structural element has a hydrophilized surface.

144. (new) The medical implant of claim 142, wherein said structural element is a spaghetti-like strand.

145. (new) The medical implant of claim 144, wherein said spaghetti-like strand comprises silicone rubber.

146. (new) The medical implant of claim 144, wherein the outer surface of said spaghetti-like strand is hydrophilized.

147. (new) A medical implant comprising an outer covering containing therein at least one spaghetti-like strand made of a physiologically compatible material having a surface that is wettable by a fluid lubricant.

148. (new) The medical implant of claim 147, wherein said implant has a hydrophilized surface.

149. (new) The medical implant of claim 147, wherein said physiologically compatible material comprises silicon rubber.

150. (new) The implant of claim 149, wherein the surface is hydrophilized surface and the lubricant is aqueous.

151. (new) The implant of claim 148, wherein the fluid lubricant is aqueous.

152. (new) The implant of claim 147, wherein the fluid lubricant is swellable.

153. (new) The implant of claim 149, wherein the fluid lubricant is swellable.

154. (new) The implant of claim 147, wherein the fluid lubricant is selected from the group consisting of a polysaccharide and a glucosaminoglycan.

155. (new) The implant of claim 147, wherein a surface of the implant is hydrophobic.

156. (new) The implant of claim 147, wherein said implant contains fat or oil wetting the hydrophobic surface as the fluid lubricant.

157. (new) The implant of claim 149, wherein said implant contains fat or oil wetting the hydrophobic surface as the fluid lubricant.

158. (new) The implant of claim 149, wherein said physiologically compatible material is a plastic.

159. (new) The implant of claim 149, wherein said physiologically compatible material is a plastic.

160. (new) The implant of claim 155, wherein material said physiologically compatible material is a silicone rubber.

161. (new) The implant of claim 147, wherein said physiologically compatible material is polydimethylsiloxane.

162. (new) The implant of claim 147, wherein said physiologically compatible material is a polysaccharide.

163. (new) The implant of claim 158, wherein the plastic is cuprophane.

164. (new) The implant of claim 147, wherein the physiologically compatible material has a foam structure.

165. (new) The implant of claim 147, wherein an X-ray contrast medium or a dye is incorporated into the physiologically compatible material.

166. (new) The implant of claim 149, wherein an X-ray contrast medium or a dye is incorporated into the physiologically compatible material.

167. (new) The implant of claim 130, comprising a plurality of spaghetti-like strands.

168. (new) The implant of claim 132 comprising a plurality of spaghetti-like strands.

169. (new) The implant of claim 147 comprising a plurality of spaghetti-like strands.

170. (new) The implant of claim 149 comprising a plurality of spaghetti-like strands.

171. (new) The implant of claim 130, wherein said spaghetti-like strand is solid.

172. (new) The implant of claim 132, wherein said spaghetti-like strand is solid.

173. (new) The implant of claim 147, wherein said spaghetti-like strand is solid.

174. (new) The implant of claim 149, wherein said spaghetti-like strand is solid.

175. (new) A method of implanting a medical implant into a subject comprising implanting an implant consisting of a spaghetti-like strand of silicon rubber in the desired site of a subject.

176. (new) A method of implanting a medical implant comprising implanting the implant of claim 129 at a desired site of a subject.

177. (new) A method of implanting a medical implant comprising implanting the implant of claim 130 at a desired site of a subject.

178. (new) A method of implanting a medical implant comprising implanting the implant of claim 131 at a desired site of a subject.

LI
Conch
179. (new) A method of implanting a medical implant comprising implanting the implant of claim 147 at a desired site of a subject.

180. (new) A method of implanting a medical implant comprising implanting the implant of claim 149 at a desired site of a subject.

181. (new) The medical implant of claim 132, wherein said structural element has a wettable surface.
